

FUTUR'BUS

DON'T WORRY

Introduction Deck

What if you wanted to track your children? And want to be updated about their journey to school?

Call the bus driver? Or Call the school?

In fact in case of any emergency, nothing really works and creates huge stress for the parents and the school.

**The stress of being worried
about your children can now be
solved by tracking your children
in real time.**

FUBUS Introduces a system to track and organize your child's life and takes care of all the concerns regarding parents, students, drivers and schools using the latest state of the art technology.

It also allows parents to communicate with the driver & the school. To see their child boarding and leaving the bus, which includes real time tracking by using a simple mobile app.

Benefits for the school...

Revenue

It is an opportunity to earn additional revenue providing this service to parents.

Administration

It will be a supportive tool for the administration to manage Students, Drivers, and Buses.

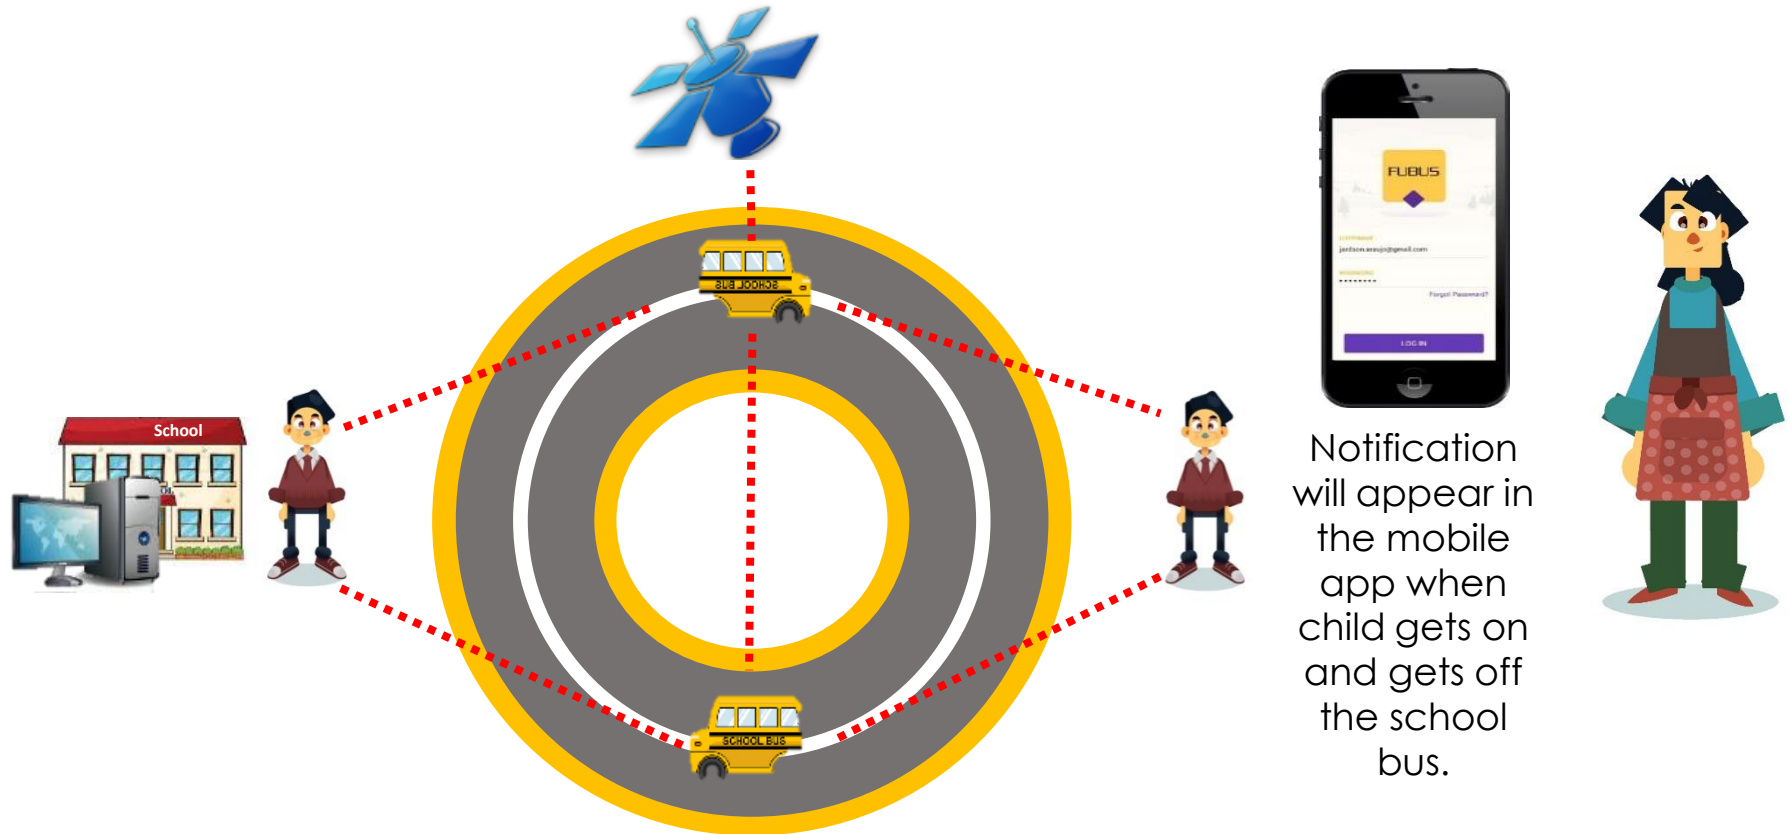

Safety

It gives safety and security to the school and parents by keeping track of students, driver and the bus.

Edge

It gives a competitive edge to the school by adding this service to your administration

Working in a smooth manner....

Parents will receive notification on every stop...

(1) First notification "Bus on the way to your home within 15 minutes".

(3) Second Notification "Bus on your door"

(5) You can open the application and track the bus on the map until it reaches the school.

(2) You can open the application and follow the bus on the map.

(4) Third notification "Student boarded to the bus"

(6) Student de-boarded the bus at school.

And much more...

Children Absence Notification

Parents can inform school by using the app if the child is going to be absent on any particular day.

Hurry Up Notification

If the child is late, the driver can send the hurry up notification instantaneously.

Web Portal gives you detailed options
